SAFETY FIRST, STEWARDSHIP ALWAYS.

At Featherman, we design equipment with intention—for your birds, your land, and the long run. Whether you're retrofitting a current coop or starting from scratch, the 48" Nest Box makes egg collection simpler while supporting the health of your flock and the efficiency of your workflow.

Follow these instructions carefully, and inspect all parts before and after installation. Improper use or modification outside these guidelines may affect performance or void your warranty.

STEP-BY-STEP ASSEMBLY

Step 1: Side and Base Assembly

- Attach side panels to the base using 1/4" x 1/2" hex bolts and flange nuts (x8 total).

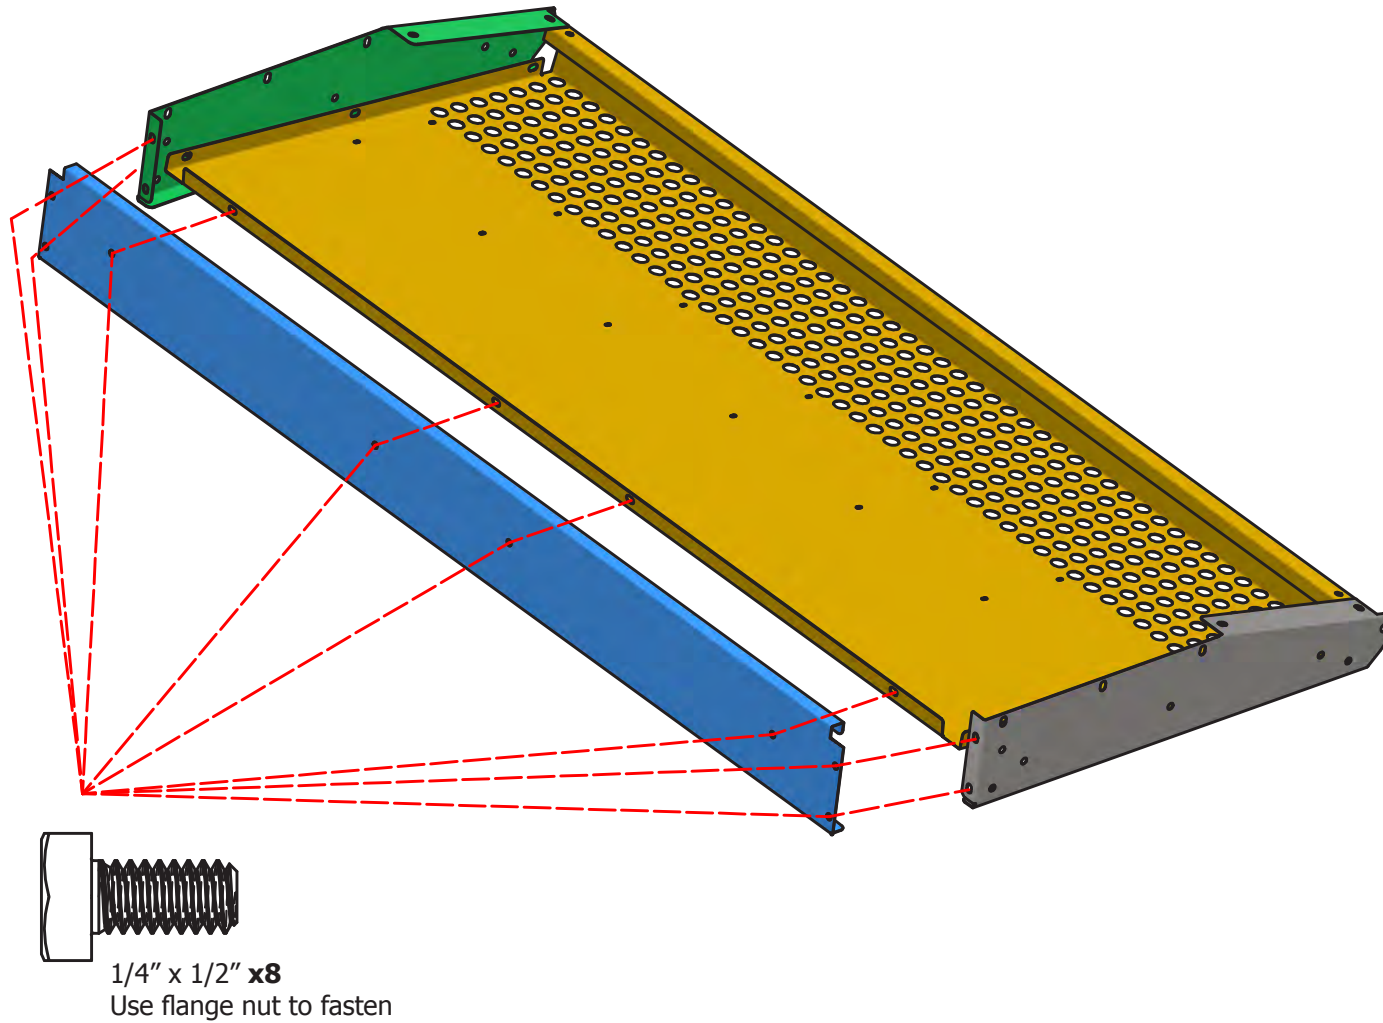

Assembly Tip

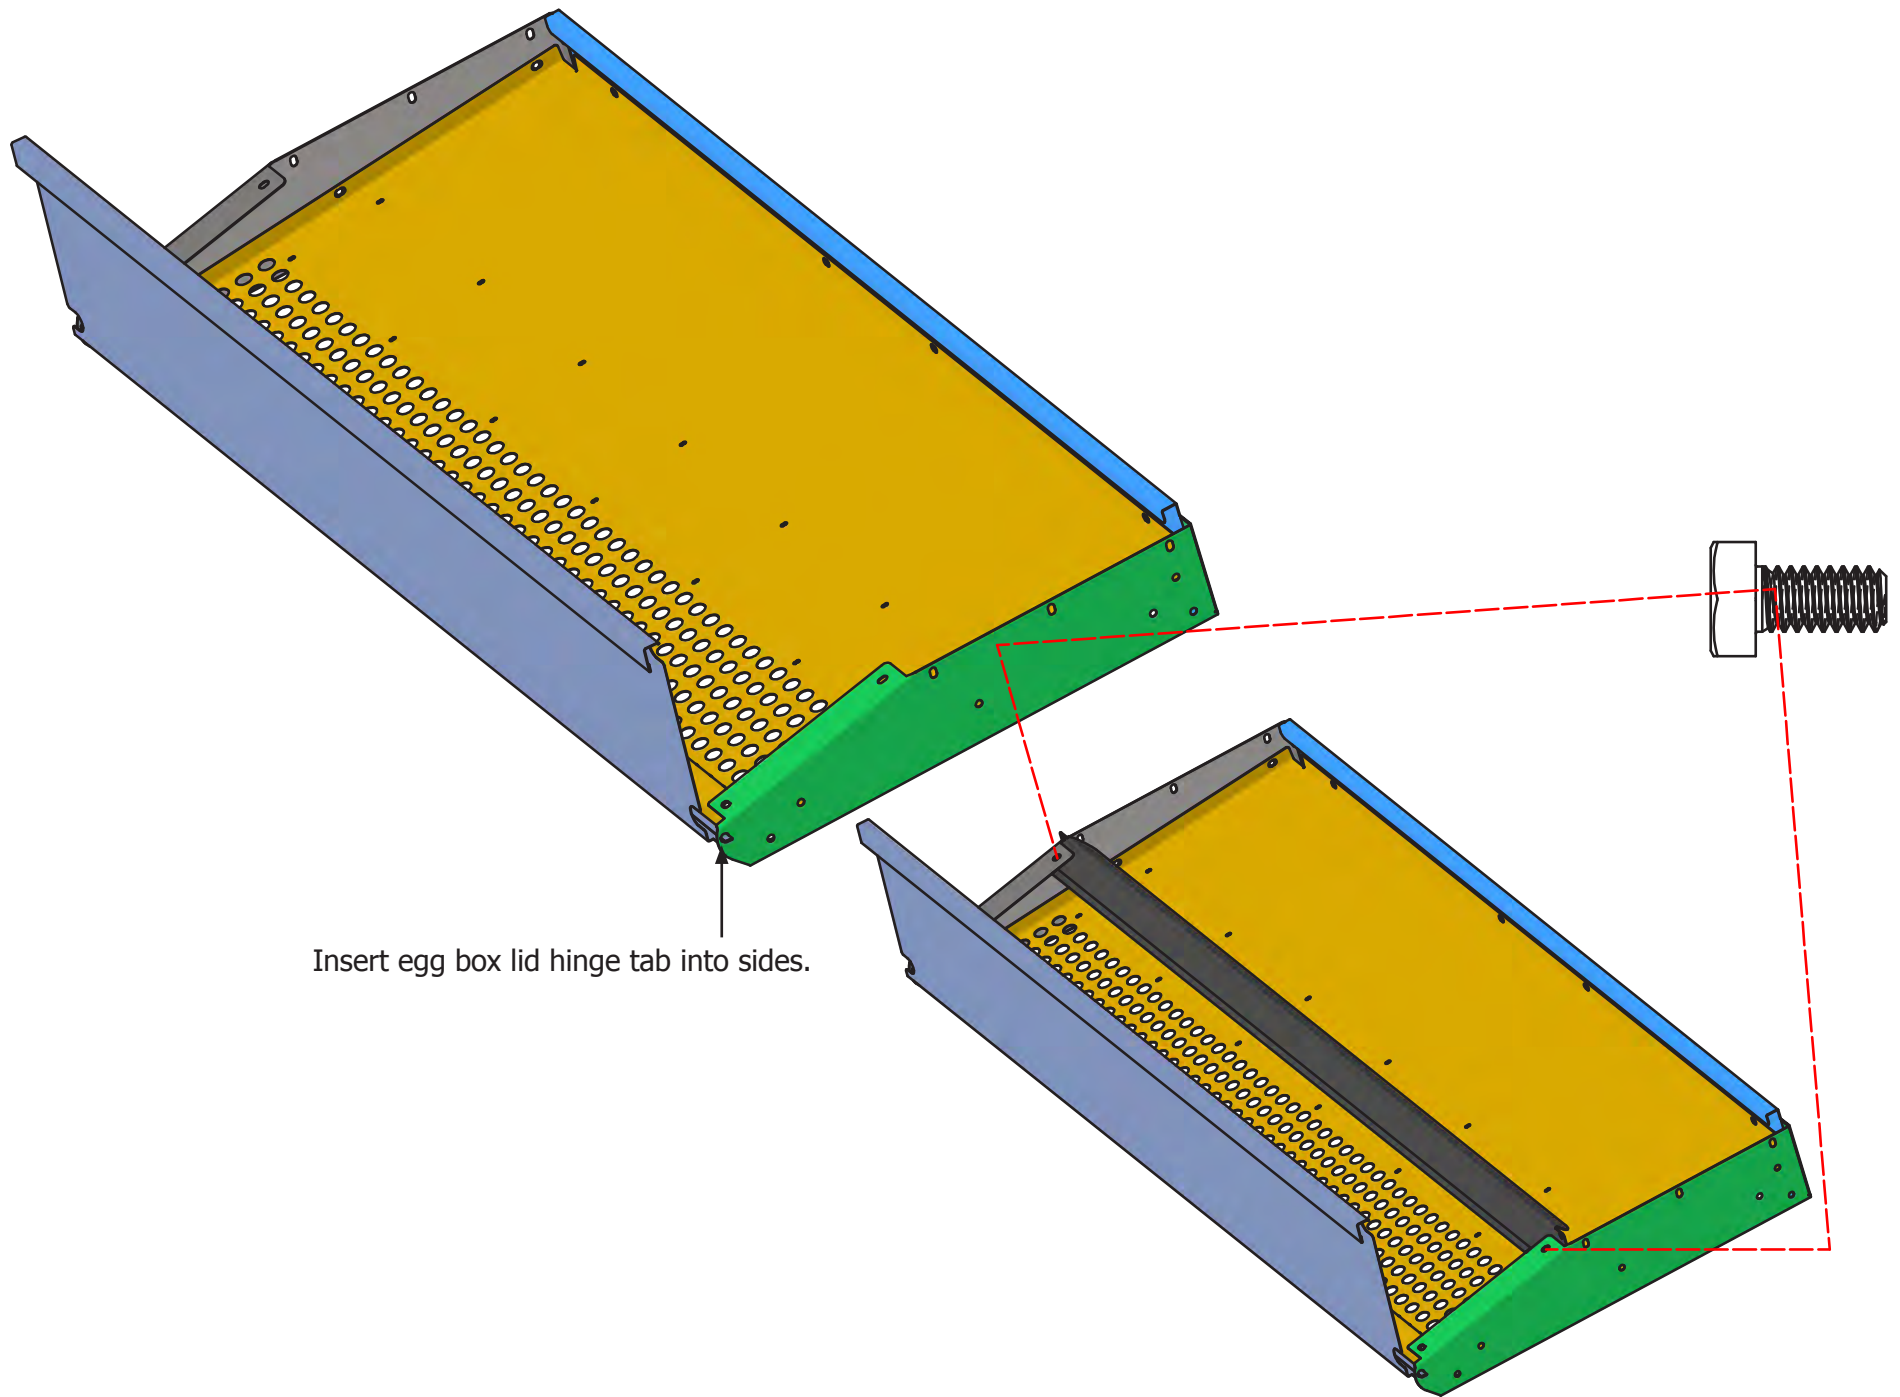

Do not fully tighten bolts until egg box lid is installed.
Use flange nuts for all 1/4" bolts unless otherwise noted.
All bolts: 1/4" x 1/2" unless stated otherwise.

Step 1: Side and Base Assembly

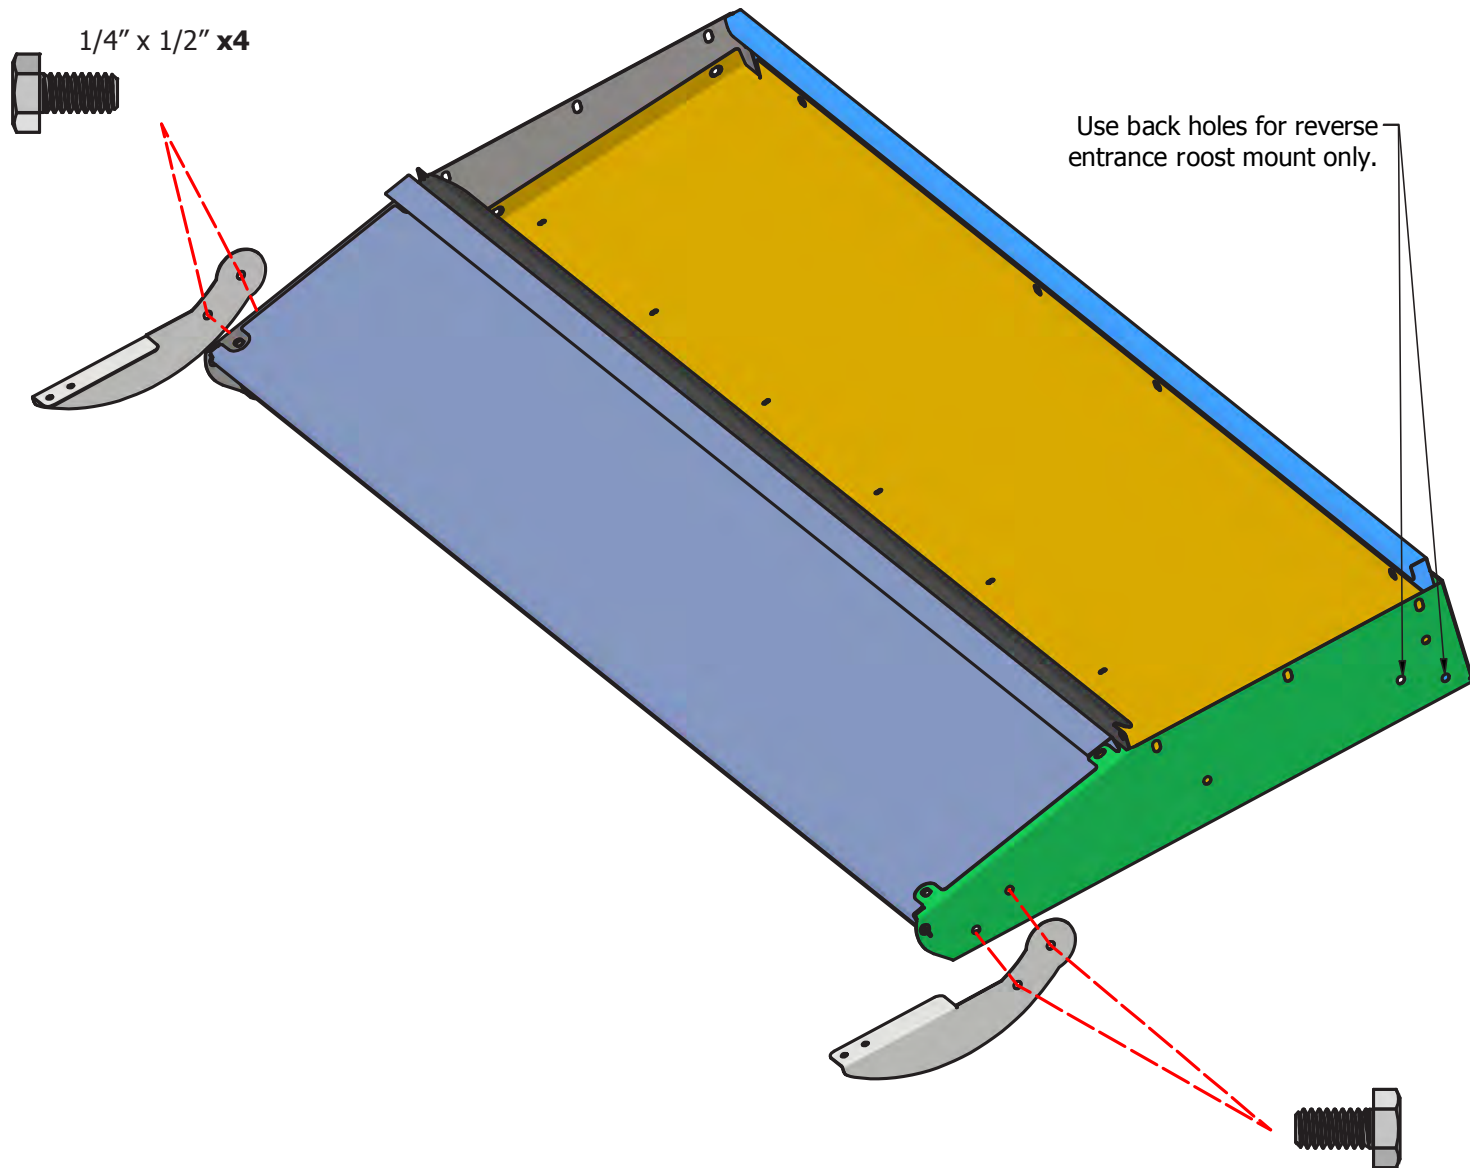

- Use the rear holes if configuring for reverse (back) entrance.

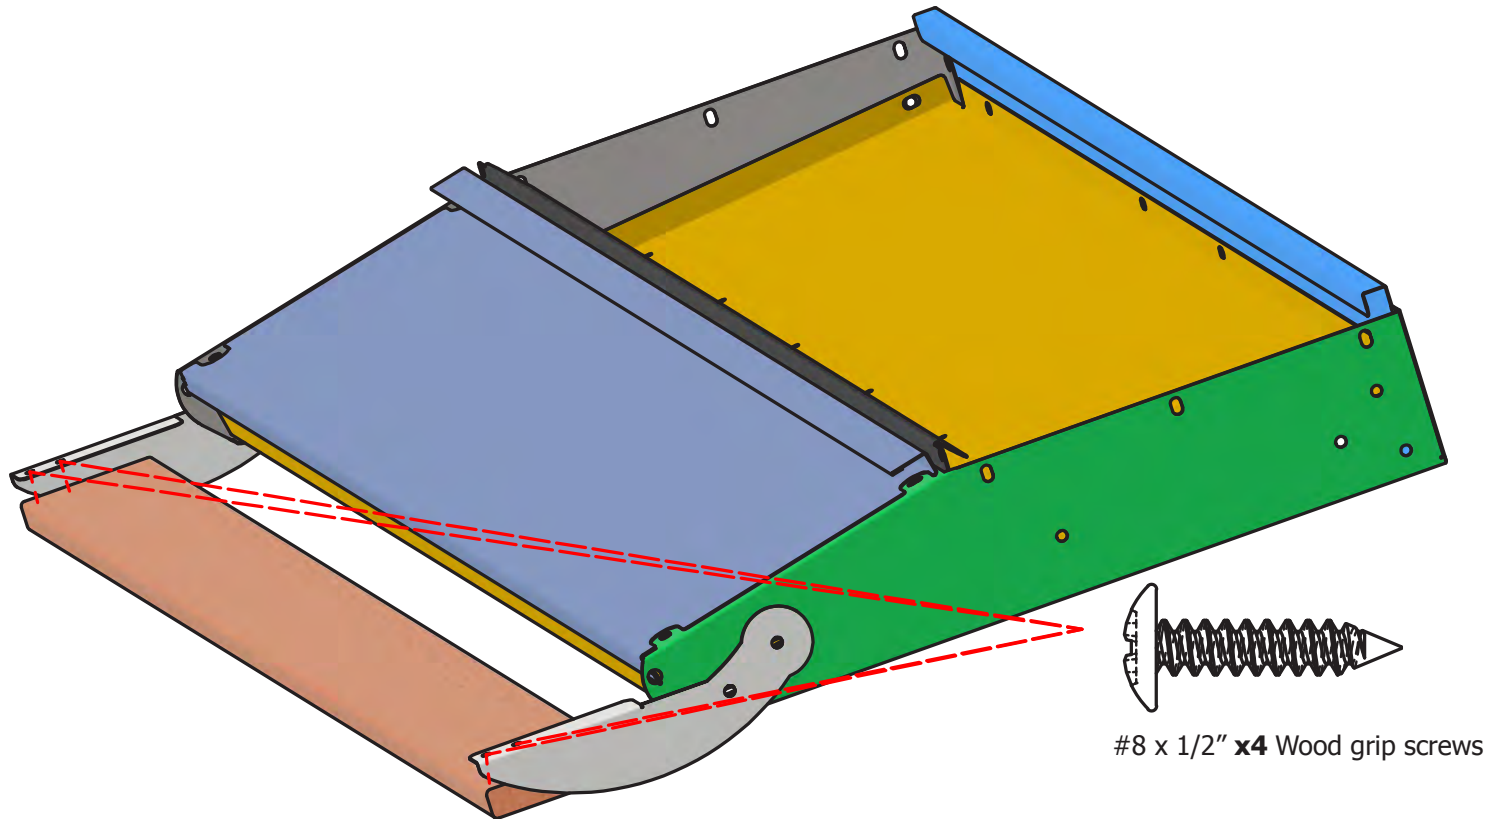

Step 2: Install Roost Support

- Position roost support between sides as shown.
- Secure with 1/4" x 1/2" bolts and flange nuts (x4).

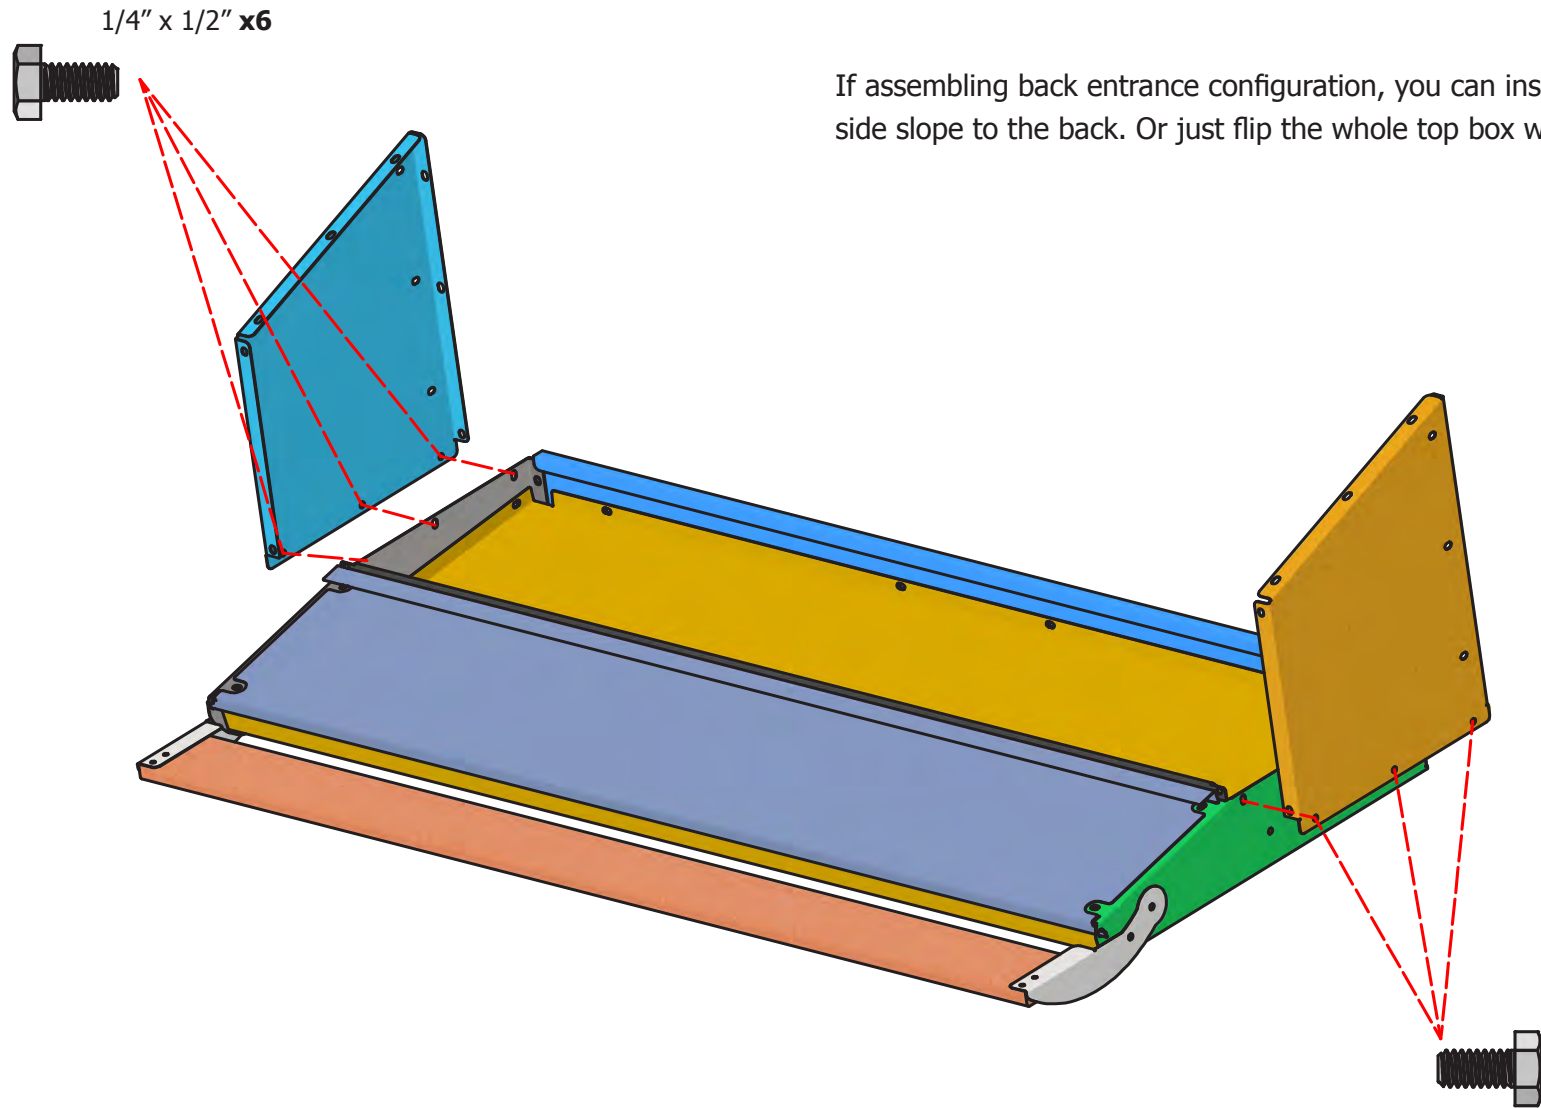

Step 3: Attach Back Bottom Panel

- Align panel to back side of base.
- Fasten using wood grip screws #8 x 1/2" (x4).
- If building back entrance version, install lid support screws into this panel.

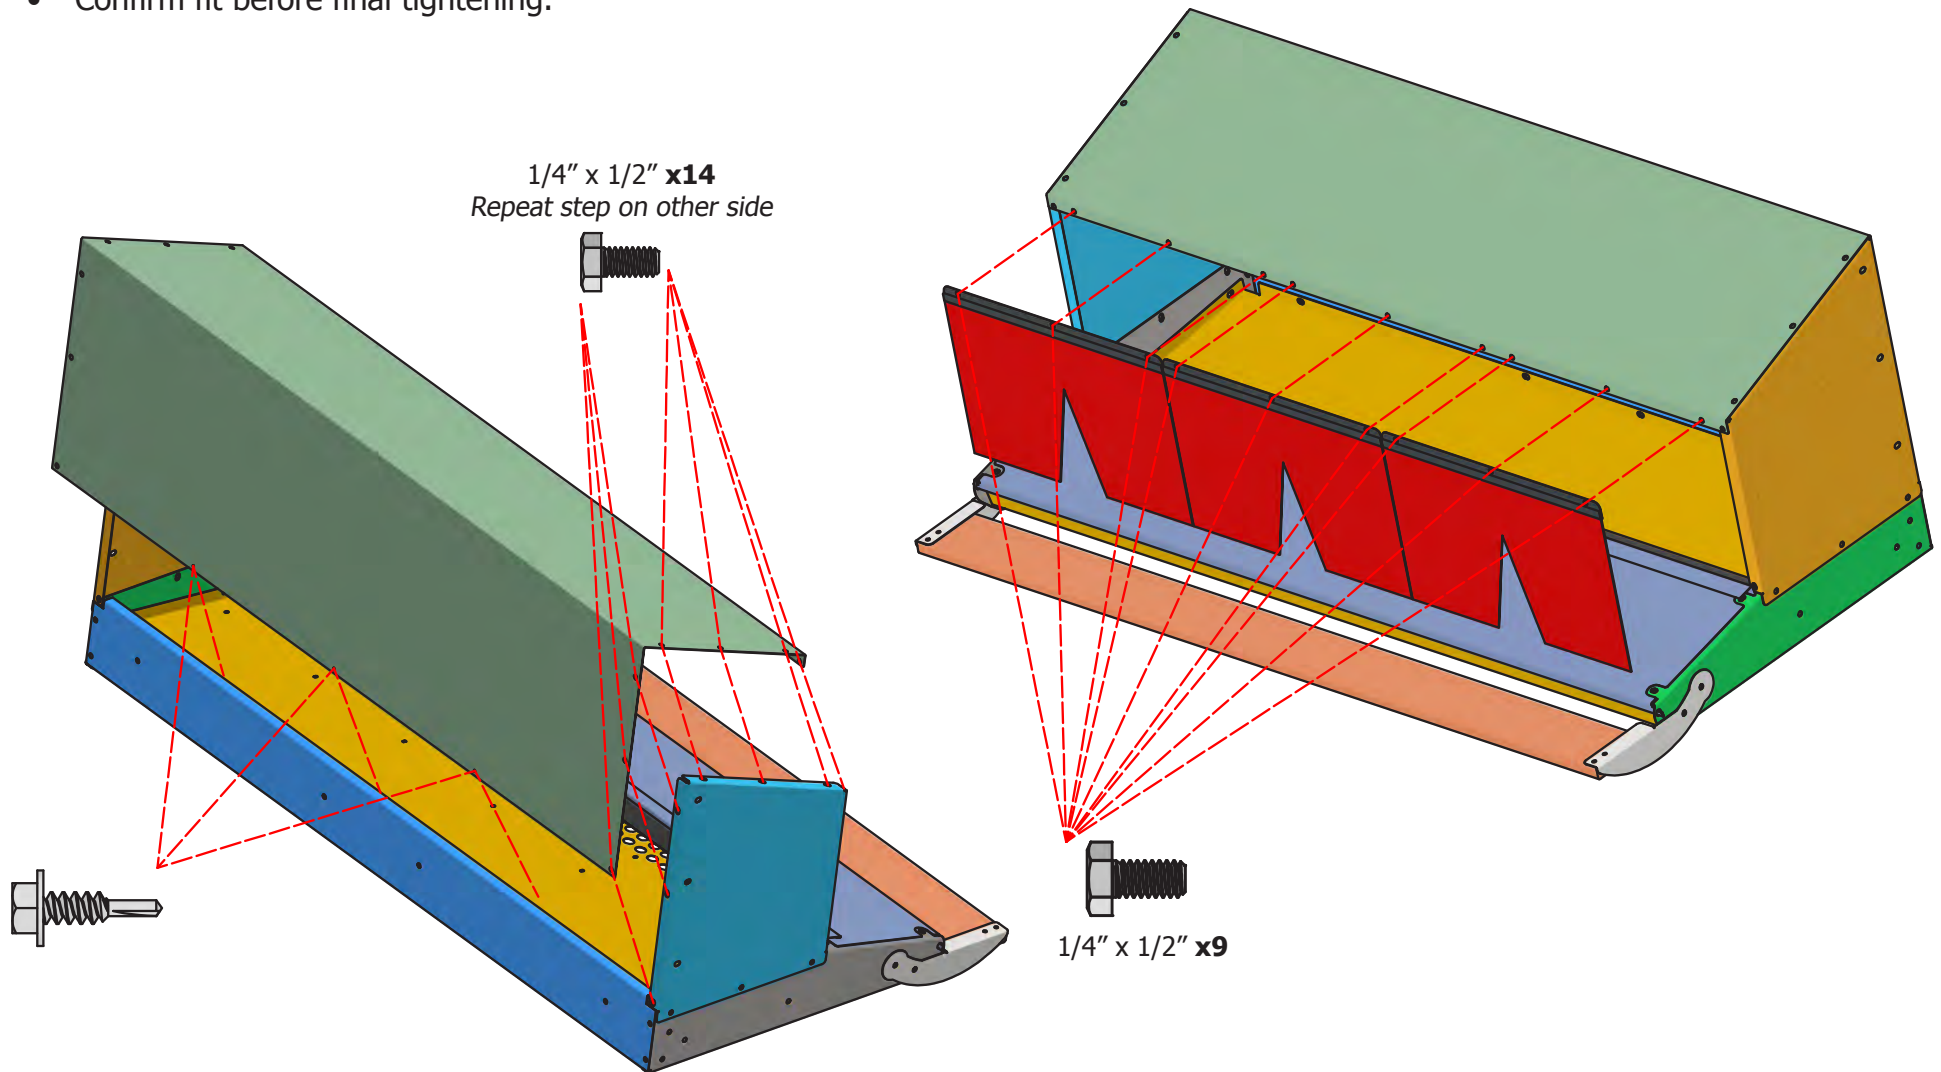

Step 4: Install Egg Box Lid

- Insert hinge tabs of the egg box lid into side panel slots.
- Secure using 1/4" x 1/2" bolts and flange nuts (x2).
- Tighten all bolts only after lid is fully aligned.

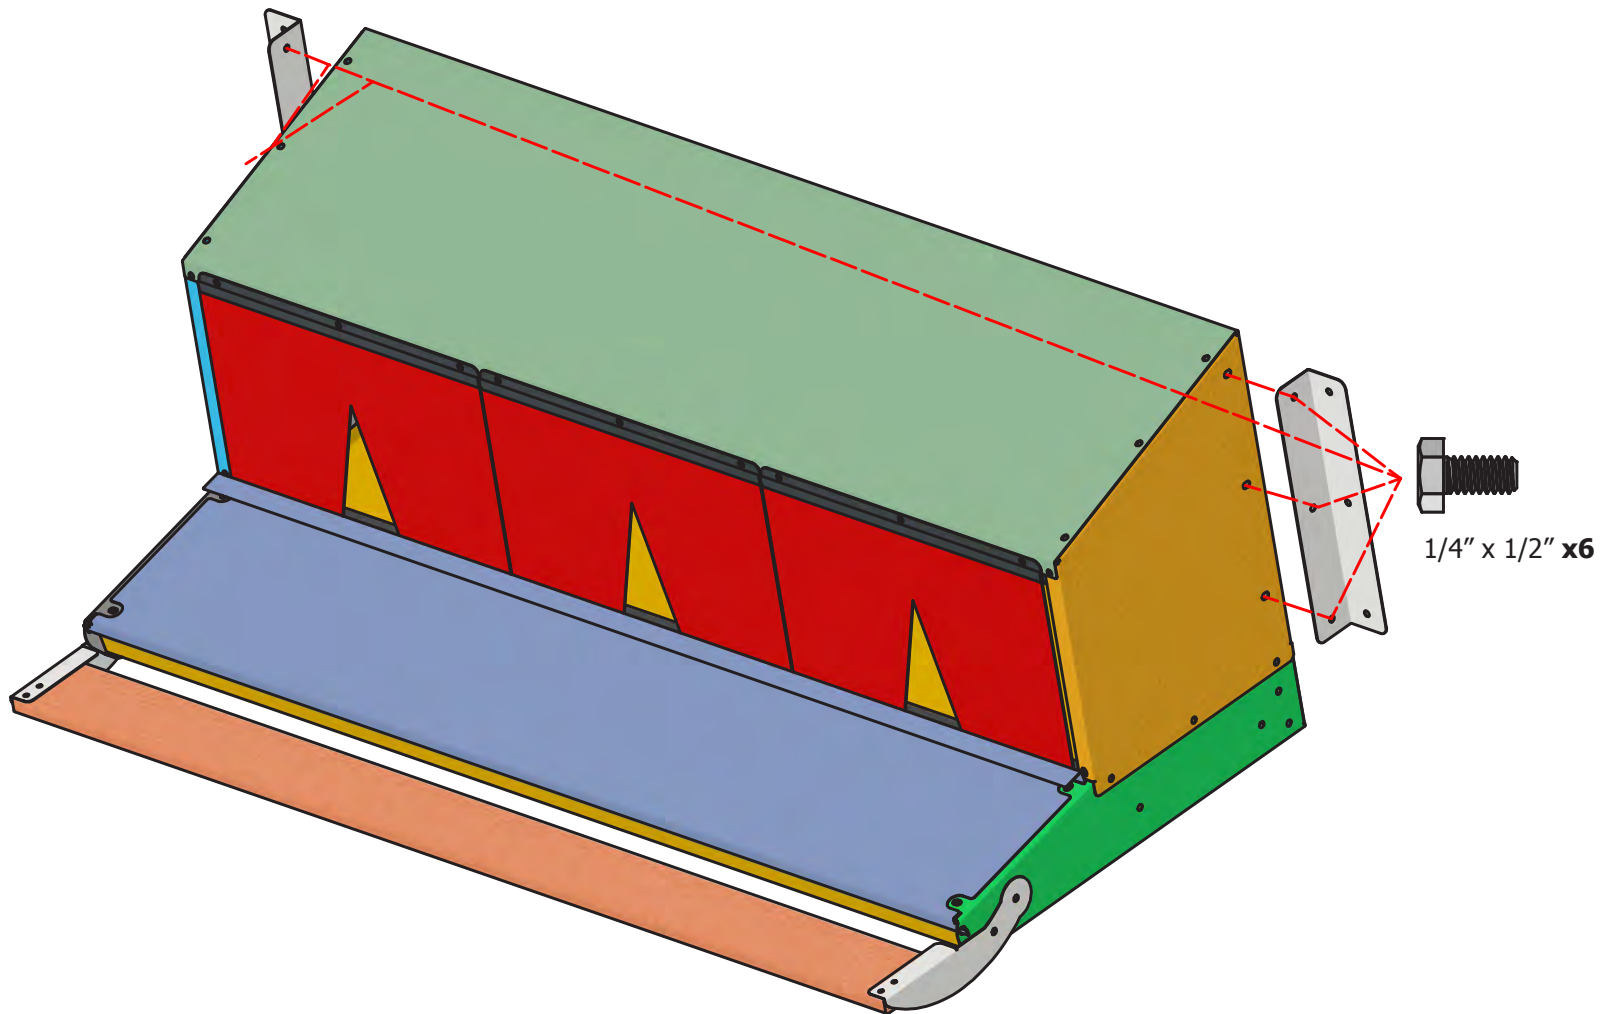

Step 5: Install Lid Support & Curtain

- Attach lid support and curtain using sheet metal screws #8 (x3).
- Confirm fit before final tightening.

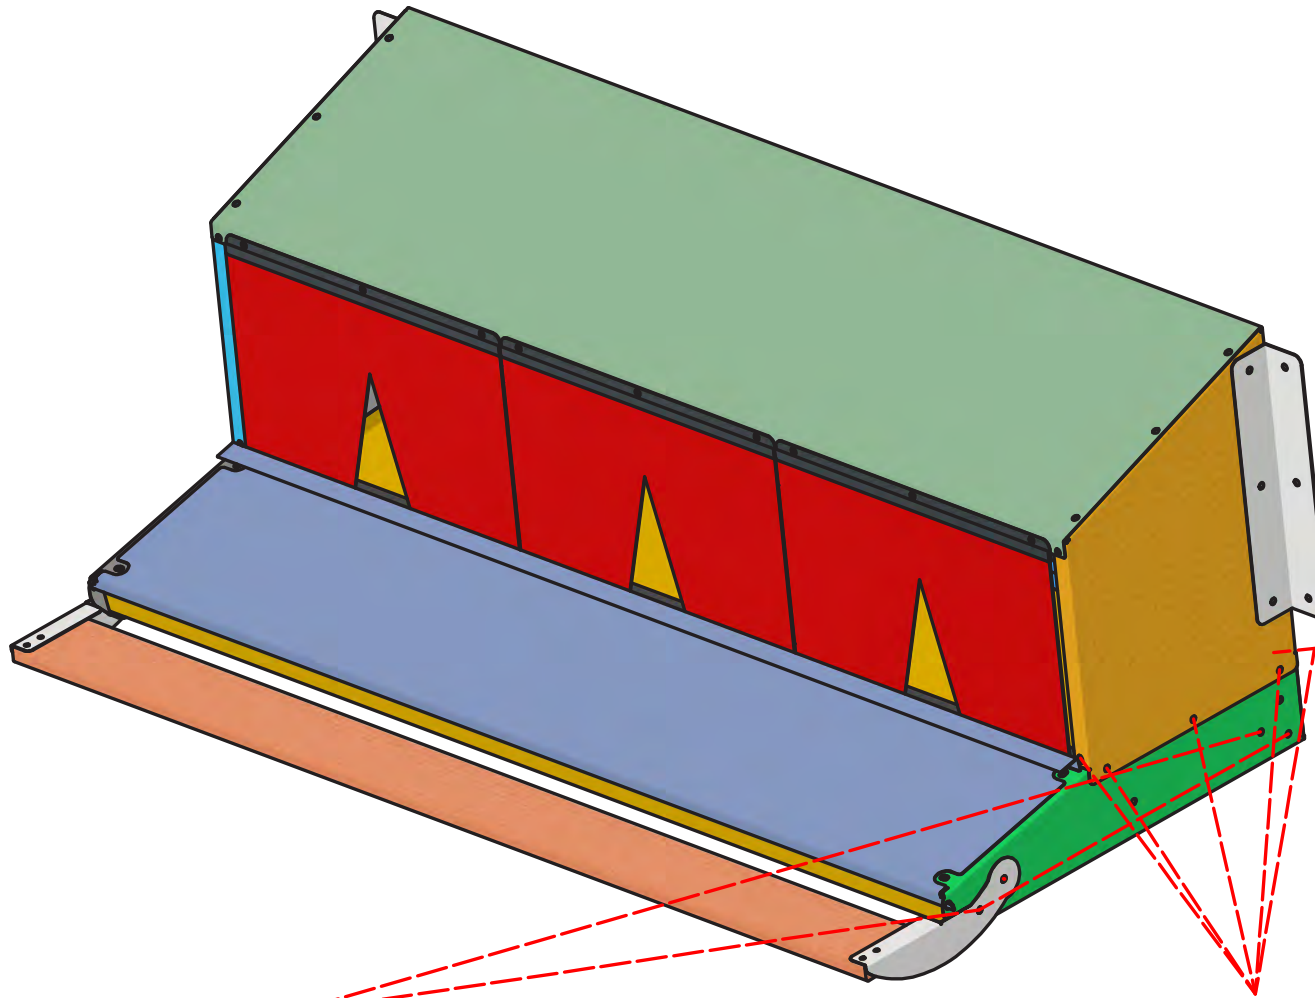

Step 6: Top Cover and Mounting Bracket

- Position top cover over the entire assembly.
- Secure with 1/4" x 1/2" bolts and flange nuts (x6).
- Attach mounting bracket as needed (x4 bolts).

Optional: Back Entrance Configuration

- To convert to a back entrance, flip the entire top box and move roost support to the rear.
- Reuse side holes as needed for entrance opening.
- Back entrance configuration also requires removing 5 bolts on both sides to rotate.

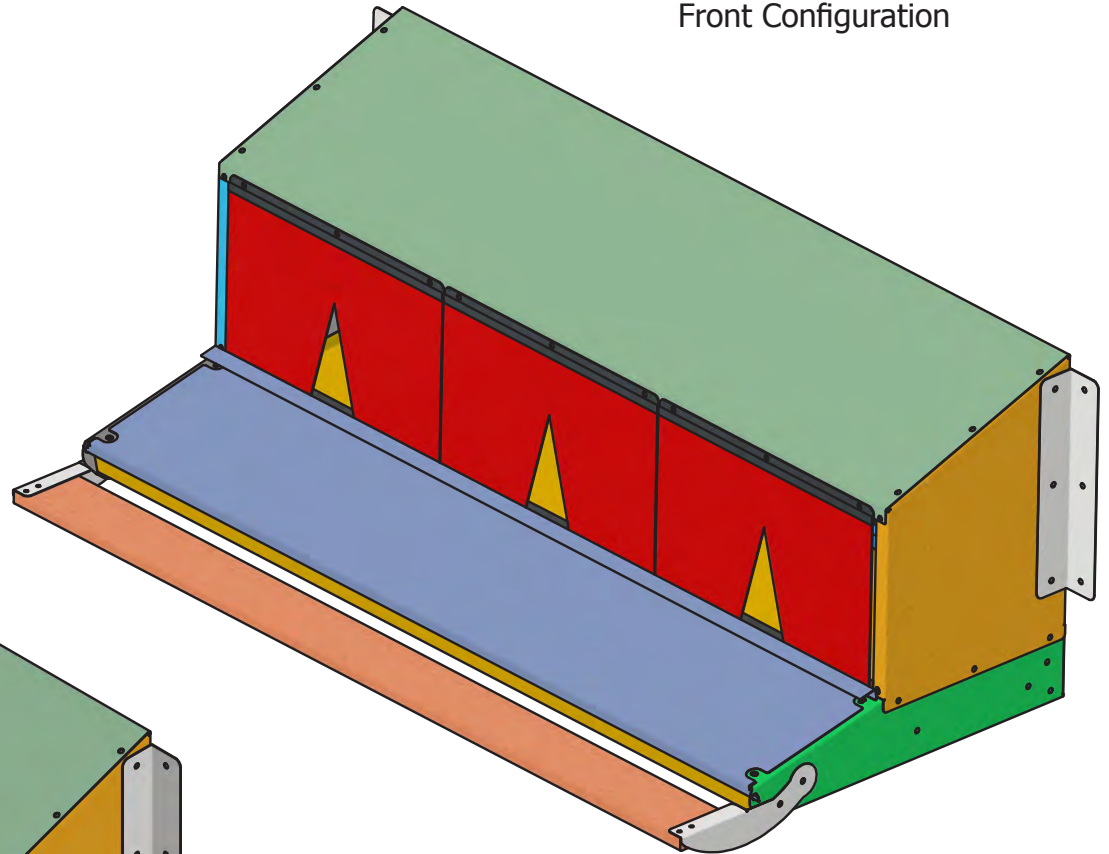

Back entrance configuration also requires you to move roost assembly to back side.

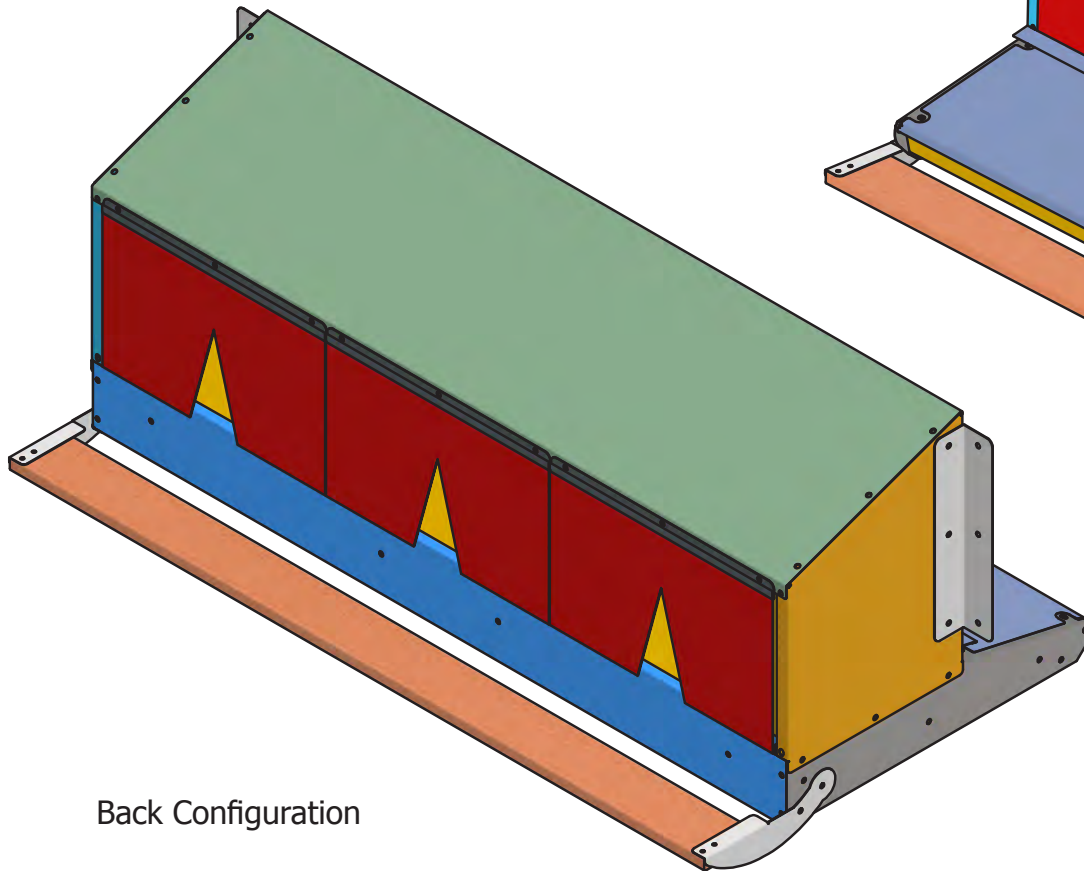

To flip entrance to the back side take out 5 bolts on both sides, and flip entire box.
